

Rotary Loading & Accumulating Turntables

TURNTABLES

APACKS Rotary Turntables are manufactured to increase the efficiency of any production line. Our Loading or unscrambling Turntables transfer single filled bottles onto a conveyor, enabling operators to maximize production capacity. Accumulating Turntables remove finished products from the active conveyors and assist in efficient packaging into shipping containers.

Our standard construction is comprised of a heavy duty 304 stainless steel frame. Optional models are available for sanitary, hazardous, flammable and corrosive production lines.

APACKS Rotary Turntables are used in the production of cosmetics, food and beverages, cleaning and specialty chemicals, pharmaceuticals, personal care and more.

SPECIFICATIONS

Standard Construction: Heavy duty 304SS frame, enclosure, top and rails

Standard Top Diameter: 28", 40", 48" or 60"

Standard Height: 36" +/- 2"

Electrical:

- 90VDC gear motor
- Variable speed Nema 12 control box

Power Requirement:

115V, single phase, 4A, 50-60Hz

Standard Features:

- Stainless steel/poly single side rail with tool-less adjustments
- Clockwise or counter clockwise rotation

Rotary Loading and Accumulating Turntables

OPTIONS

- Double Rail System
- Custom height and sizes
- Custom diameters
- Sanitary, hazardous, flammable and corrosive environment construction
- 16" Transfer Table
- Half-moon Loading or Accumulating
- Swivel casters for portability
- Custom applications
- 230V, single or 3 phase, 50/60Hz
- Washdown motor
- Nema 4 or Nema 4x control box

- **Complete line of filling and packaging solutions**
- **Standard filling machines in stock and ready to ship**
- **Economical prices, installation services and excellent customer service**
